Anatomy Student visit Cyberspace

The Spring Semester Anatomy & Physiology students are now all "logged" on to their e-mail accounts and visiting various internet sites. Resource topics they have received for both in class assignments and extra credit assignments are opening their opportunities to the world wide web. The results we are seeing already are fantastic! Many of the students are reaching new levels of understanding and cooperation with this new adventure. The Anatomy & Physiology students are also participating in the Rural Systemic Initiative as co-instructors in the Science Centers and Lab Assistants to the 5th & 6th graders at Theodore Jamersons next month for dissection labs.

Thanks to all my students for their participation!!!

Liz Miller, Anatomy & Physiology Instructor

Maintenance Department

With the warm weather and no snow our yards are looking shabby. Lets pick up toys and trash. Park in the driveways. Ruts will form in the grass with the warm weather. Houses on the south side of the campus, please cleanup behind your house. Driving along on the highway to U of Mary, the area looks terrible. Lets make it look presentable. Thanks.

ATTENTION:

United Tribes Technical College people, students and staff. The Hospitality Management Department is starting a Coupon Drive. The needs and wants of the Art and Science of Culinary preparation is indeed demanding. Costs can cut with the help of Coupons. A donation of any food product coupons would be Greatly Appreciated. The latest recommendations from the State Health Department for the treatment to influenza are as follows:

Children who are symptomatic or have been diagnosed with influenza are contagious for approximately (7) days. Adults who are symptomatic or have been diagnosed with influenza are contagious for approximately (5) days. Once symptoms appear, children and adults are asked to remain at home to be treated. The illness is highly contagious within a small population such as United Tribes Technical College campus. Approximately 30 cases of influenza have been reported to the SHC. Once a person becomes symptomatic it is recommended that the person obtain a prescription of Amantadine to shorten the course of the illness. Amantadine must be obtained within 24-48 hours of the onset of symptoms to be effective.

Continued from page 3.

A few cases of Chickenpox have also have confirmed on campus. If your child has not had chickenpox before and has suspicious skin lesions, pustules, or a rash, please have it checked out by SHC nurses before taking them to the elementary or daycare areas.

SHC nurses transport those students who have medical or dental appointment to Ft. Yates PHS weekly. If you are in need of transportation, please make arrangements with SHC staff.

Lady Thunderbirds Update

Hello from the UTTC ladies' basketball team! This is Michelle with a bit of news from the Lady Thunderbirds. I'm going to be doing some short interviews on each of the ladies on the team. I think it would be nice to give the girls some attention!

Here are this week's interviews:

Lisa Marie Yellow Horse, age 20, graduated from Red Cloud High School in 1996. Lisa is in the LPN vocation, and she wants to be a Physician's Assistant someday. Lisa is Oglala Lakota from the Pine Ridge Reservation. Some words of wisdom from Lisa: "Work hard. Stick to your goals."

Norma Lynn Two Bulls, age 19, also graduated from Red Cloud High School in 1996. Norma is in Office Technology, and she wants to go into Computer Science in the future. Norma is Oglala Lakota from Pine Ridge, also. She shares this bit of wisdom with us: "Keep a good attitude, and work hard!"

These two young ladies are an integral part of the team. Norma makes practice a whole lot more fun because she makes us laugh. Lisa is our most consistent high scorer, thanks to her excellent posting-up skills. Both are hard workers who attend every practice.
